

### **Pre-Treatment Instructions- Hyfrecator**

The HYFREATOR® 2000 can destroy a variety of benign skin lesions. With its wide range of power settings, the HYFREATOR® 2000 treats even the most delicate facial lesions as well as the thickest scaling lesions of the trunk.

The Hyfrecator can treat the following:

- Skin tags
- Cherry Hemangiomas
- Benign Lesions such as:
  - Seborrheic Keratosis
  - Fibromas
  - Sebaceous Hyperplasia

**DURING THE TREATMENT:** Some patients may experience discomfort including but not limited to a snapping, hot, or tingling sensation. Comfort measures are available prior to and during treatment. Multiple treatments may be needed for optimal results.

**Post-Treatment Instructions- Hyfrecator**

Daily use of sunscreen SPF of 30 or higher is recommended.

Keep the area clean and dry. Triple antibiotic ointment may be applied if desired.

The treated area will scab. Do not pick, peel, rub, scrub, or irritate your skin in any way while it is healing, as this may cause scarring.

The area should be healed within 2 weeks.

You may resume your regular skincare routine 5 days after treatment once the area is scabbed over.

Please contact the clinic for persistent or worsening redness, pain or drainage.
